

Product Name: Pill Pal
Team Name: Pill Pal Team
Sprint Completion Date: 4/24/2024

Sprint 1 Report

Actions to Stop Doing:

- Our team formed a little late and getting the development environment set up took longer than anticipated, so we currently don't have anything we want to stop doing. Everyone made progress on or finished their part of the sprint, so we're satisfied with what we got done.

Actions to Start Doing:

- Pushing to GitHub more often
 - The team should be pushing to github more often so we can see each others' progress.
- Work Sessions
 - The team should try adding a couple of work sessions to help work out issues each other are having and help with collaboration on shared user stories and tasks that are related.

Actions to Keep Doing:

- Updates on Discord
 - Aside from the scheduled meetings, the team should keep everyone updated on recent progress on Discord. It helps keep everyone on the same page, even when we're developing locally.

Work Completed/Not Completed:

- Completed:
 - Notifications: "As someone who takes prescriptions/medications, I would like to be able to receive notifications from the app."
 - Adding Meds: "As someone who takes prescriptions/medications, I would like to add my current medications to the app."
- Uncompleted:
 - Edit/Delete Meds: "As someone who takes prescriptions/medications, I would like to edit or delete my current medications on the app"

Work Completion Rate:

- Total number of user stories completed: 1
- Total number of estimated ideal work hours completed: 6
- Total number of days: 14
